Beechcraft
KING AIR

THE MOST POPULAR TURBOPROP

Over 40 years ago, I bought my first aircraft with the desire to travel into Australia's outback. It was a small single engine aircraft and over the years we have progressed to 9 seat aircraft with the pride of the fleet being our incredible Beechcraft King Air.

The Beechcraft King Air is the most popular business turboprop in the world, and for good reason. Nearly 40 million flight hours have been logged in the entire King Air fleet worldwide since the first aircraft was delivered in 1964. With its rugged design and more than 40 years of heritage the King Air has proven itself time and time again that it is one of the most dependable and predictable turboprop aircraft around.

INTERIOR

Simple and sophistocated

Our Beechcraft King Air is the epitome of comfort, class and style. Immaculately presented for corporate travel, the legendary comfort of the King Air's square-oval interior offers generous head and shoulder room, unmatched by conventional cabin cross sections. The King Air interior is furnished with finely crafted reclining seats set in a club configuration, fold out mahogany tables for productivity on the go and is fitted with USB charging points throughout the cabin.

Reading lights are fitted above each of the seats along with airconditioning vents. Enjoy light snacks and water from the refreshment centre as you travel in this superb aircraft.

AIRCRAFT RANGE

*Subject to actual weights and weather requirements
