Cessna
Grand Caravan EX

THE NEXT GENERATION

In 2021 we made the decision to acquire our first Cessna Grand Caravan EX. The EX is the latest offering from Cessna, who've developed the Caravan from humble begins into a true go-anywhere, do-anything aeroplane - perfect for exploring outback Australia.

The Caravan family is renowned around the world for its large cabin, versatility, and ability to land at almost any airstrip. From the highlands of PNG to the northern territories of Canada, you'll find Caravans visiting places no other aeroplanes of its size can. The Grand Caravan EX brings modern comforts such as club seating and air conditioning to a tried and proven touring platform.

INTERIOR

An outstanding view

The Grand Caravan EX offers panoramic views to passengers, with a high wing and large windows allowing an uninterrupted view of the horizon in all directions. Configured in club (seats facing each other), you'll be able to stretch out with ease while enjoying the adventure with your travelling companion opposite.

Seating is leather finished and comfortable, with headrests to ensure you have a comfortable journey. Powered by a Pratt & Whitney PT6 turboprop, cabin noise is one of the lowest in class - only at 76dB during take-off, akin to the sound of a normal conversation.

CAPACITY

Excess baggage

With its large cargo pod and aft cabin storage area,, the Cessna Grand Caravan EX offers more than 4m^3 of luggage space with seating for 9 passengers - more than double any other comparable aircraft of its size. The cargo pod can easily accommodate golf clubs, oversize ski and snowboard equipment or international baggage.

Oversized items may also be loaded into the aft cabin, or into the main cabin area (with removal of seats), through the 1.24m x 1.27m cargo door. When configured for cargo, the Caravan is suitable for up to 13m^3 of almost anything
